

# Remote Learning with Lexia® Programs During Extended School Closures

Lexia® Core5® Reading and Lexia® PowerUp Literacy® can be used from home as part of a remote learning implementation during extended school closures or other special circumstances. This document provides information about key program features to help inform educator contingency planning and support the successful continuity of student learning.

## Students can log in to Core5 and PowerUp from home.

We recommend creating a plan for how students will log in at home and sharing that plan with parents. Teachers can share Home Letters with families that are already crafted in multiple languages:

[Core5 Home Letters](#)

[PowerUp Home Letters](#)

Whether students will log in to Core5 or PowerUp directly, or via your school's LMS or landing page, make sure they know where to go to log in, and that you provide them with what they need to log in, such as their username and password, or Clever badge. Students may also need a teacher email address to set up their devices.

## Students can also continue learning using printed program resources, such as Lexia Skill Builders.

This option can be especially helpful in instances where supported devices are not available at home.

## Core5 and PowerUp offline instructional resources can be printed ahead of time and sent home for extended practice and review.

- Core5 Skill Builders
- PowerUp Skill Builders

Visit [myLexia.com](#) > Resources > Core5 Resources Hub > Support for Instruction for:

- Core5 Flash Cards
- Lexia Close Reads for Core5
- Printable Core5 Comprehension & Fluency passages

Visit [myLexia.com](#) > Resources > PowerUp Resources Hub > Classroom Resources for:

- Printable PowerUp Comprehension passages

## For extended periods of home use, teachers may deliver Lexia Lessons virtually and/or provide the documents to parents/learning guardians to assist with learning.

Most Lexia Lessons are scripted and require minimal materials to be delivered.

- Teachers may also consider downloading and sharing recommended Lexia Lessons with parents or guardians for instruction to be done at home.
- If access to district-approved video conferencing is available, Lexia Lessons could be used by teachers to provide targeted instruction for students.

Outside of school, **administrators and teachers can log in to [myLexia.com](https://myLexia.com)** using a supported browser or the [myLexia mobile app](#) to monitor student progress.

- We recommend that teachers log in at least once a week to check the Class Action Plan and follow up with families as needed to support students.
- Teachers may choose to communicate updates about usage and progress with families via email.

The following learning module may be helpful for teacher planning:

- [Using Core5 at Home](#) (includes information transferable to PowerUp as well)

Families can reinforce literacy skills at home by reading with their children, encouraging independent reading, and by using the following resources:

- [Core5 At-Home Tips \(English\)](#) and [Core5 At-Home Tips \(Spanish\)](#)

For technical support while using the program at home, families can contact Lexia Customer Support at [support@lexialearning.com](mailto:support@lexialearning.com) or 800-507-2772. Please note that Lexia Customer Support is not able to provide parents with student usernames or passwords, or teacher emails.

## Guidance for Schools Using Lexia RAPID® Assessment

Lexia does not recommend administering the Lexia RAPID Assessment in a home use environment. This is based on the importance of maintaining data integrity and facilitating consistency and equity across testing environments for all students. In circumstances of prolonged school closure, administrators should consider whether testing windows can be shifted or expanded until students return to school.

School administrators with questions about this recommendation or those whose circumstances require considering/planning for an alternative testing environment for RAPID administration are welcome to reach out to the [Lexia Customer Support](#) team for further discussion and guidance.
